AMERICAN NUMISMATIC ASSOCIATION

The American Numismatic Association is the largest and most active numismatic body in the world. It invites and welcomes to membership all worthy persons seventeen years of age or over, who have a sincere interest in numismatics, whether they collect coins, paper money, or medals, whether advanced collectors or only those generally interested in the subject without being collectors. The Association was founded in 1891, and has over 20,000 members from every state in the Union and many foreign countries. It is federally incorporated by an Act of Congress in 1912 and is a mutual organization for the benefit of its members.

All Association members, except Associate, receive the official publication, *The Numismatist*, without cost other than their annual dues. Membership applications should be accompanied by \$5.00 for the first year's dues and \$2.00 admittance fee. Annual dues are \$5.00. Nonmember subscription, \$6.00. Single copy, fifty cents. For application blanks, subscriptions or general information, write to the General Secretary.

The Numismatist is an illustrated monthly which has been issued continuously since its founding in 1888, consists of 128 pages or more in each number and has subscribers in about sixty countries. Advertising inquiries should be sent to the Advertising Manager. All other matters for possible publication in or concerning *The Numismatist* are to be forwarded to the Editor. Unsolicited manuscripts, which are sent at the owner's risk, and other correspondence calling for a reply must be accompanied by stamped, self-addressed envelopes. Confederate Treasury Notes:

THE CHEMICOGRAPH BACKS

By

PHILIP H. CHASE, A.N.A. No. 4286

Copyright 1960 by Philip H. Chase

THE continuing probability of new discoveries in the Confederate currency field is again exemplified by a document that turned up only a few years ago.

Credit is due to J. V. Nielsen, Jr., of Charleston, S. C., for recognizing the Straker contract in an antique dealer's shop. Its previous resting place is unknown.

The document is the original contract for the Confederate Treasury Department, dated August 31, 1863, between S. Straker & Sons, London, England, and Joseph Walker, "Agent of the Treasury Dept. Confederate States of A." It makes clear that six designs had already been made on copper plates and accepted "subject to certain alterations . . ." and that S. Straker & Sons shall "take electrotypes from such plates and to electroplate each with a coating of Silver for their better working in Colored Inks."

There can be no doubt that this unique document directly relates to the six back designs in \$5, \$10, \$20, \$50, \$100 and \$500 denominations and to the lost plates intended for printing the backs of the February 17, 1864 Confederate Treasury notes. The unusual name "Chemicograph" was derived from the imprint on the printing plates "Chemicographed by S. Straker & Sons, London." Numismatic literature has referred to these over many years as bits of evidence came to light.

The contract document supplements the Confederate Treasury Department correspondence that was published in the March, 1950 number of *The Numismatist*, which concluded in the April, 1950 number

with the Straker invoice showing the plates left England early in 1864 in three shipments to Nassau. The plates vanished, probably seized en route from Nassau to the Confederacy and only a few of the plates escaped melting down as scrap, the usual fate of such contraband.

So far as known, there is but one set of the six plates in existence. Completion of this set occurred about a decade ago following the discovery of a plate of the \$100 value and another of the \$500 value.

As it became evident this apparently unique set of Chemicograph plates was of such numismatic importance that it should be preserved in a suitable repository, the author donated the plates to the Smithsonian Institution of the United States National Museum, Washington, D.C. Prior to that action he had a limited number of sets of prints struck from the plates. Recently remaining sets of prints have been given to Dartmouth College, Hanover, N. H. The Straker contract has also been donated to the Smithsonian Institution. It seemed most fitting that this unique document should have its permanent home with the set of Chemicograph plates.

From photographs in the author's possession of proofs from the original copper engraved plates it is obvious that acceptance "subject to certain alterations" referred at least to rectifying the erroneous spelling of "Confederate" as "Confdderate" on the \$500 plate and to eliminating the shading in the four "100" numerals on the \$100 plate.

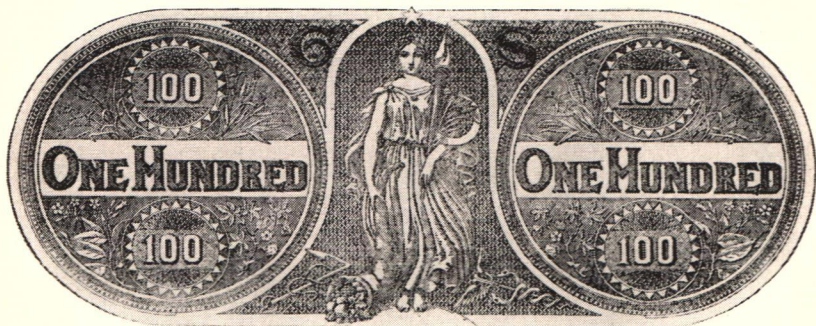

The set of six plates in the Smithsonian Institution conforms to the

requirements of the contract. They are electrotypes and silver plating is evident.

From the firm of S. Straker & Sons, Ltd., which is still in existence, it has been learned that Samuel Straker, head of the firm in 1863, coined the name "Chemicographed" for the process. Being merely a "house" name for the recognized trade name for the "electrotyping" process, reference books on the subject fail to mention it. For many years ignorance of the origin of the coined word resulted in conjecture that some radically novel process was used.

Typical of the Victorian era the Chemicograph back designs incorporate historical and allegorical subjects of considerable pertinence to the Confederate cause. Designations can be attributed to the designs:

- \$5 Liberty and Justice
- \$10 The Great Seal of the Confederacy
- \$20 The Confederate flag
- \$50 George Washington
- \$100 Learning fostering Agriculture, Navigation and Commerce
- \$500 Peace Triumphant

In marked contrast to the artistic, diversified Chemicograph designs, those which did appear on the backs of the \$5 to \$100 notes are plain and all much alike. The \$500 notes had no printing whatever on their backs.

It may be that these measures were expedients initially considered as temporary. Reuse of the more elaborate back designs of the 1863 notes probably was ruled out because the 1864 notes, intended to supersede earlier issues, continued with the same face designs and confusion would result. Unfortunately, the superior counterfeit-detering value of the distinctive Chemicograph designs was never utilized by the Confederacy.

It is evident that the Chemicographs, though failing actual use on the back of the 1864 notes, have a legitimate place in Confederate numismatics. The prints from the genuine Straker London plates are not essays, nor proofs, nor restrikes, and certainly they are not bogus or fakes. They are in a class by themselves, as are the lost \$10 Manouvrier notes. The name "Chemicograph Backs" is suitable.

Book Reviews

"Paper Money of the United States: A Complete Illustrated Guide with Prices; Large Size Notes, Fractional Currency, Small Size Notes, Encased Postage Stamps, from the First Year of Paper Money, 1861, to the Present," by Robert Friedberg. Third edition, published by the Coin and Currency Institute, Inc., New York 1, N. Y. 1959, buckram, 8 1/4" by 11", 303 pp., \$12.50.

Here, for the third time, we welcome another edition of the standard work on U. S. paper currency and find it bigger (double the size of the earlier editions), more comprehensive (for instance, each type of our current small size notes is illustrated) and more valuable to more people (besides paper money collectors, there are bankers, librarians, economists, historians and students).

In format, the book is similar to earlier editions. The text accompanying illustrations give the Friedberg number, series of the note, signature combinations, colors of the seals and valuations in very fine and new conditions. Portraits are identified.

For the first time, a geographical and numerical list of all the 14,348 National Banks chartered from 1863 through 1935 is published. All types of National Bank notes are pictured and each type is followed by alphabetical lists of states indicating those which issued the given type

note. Valuations are offered for the commonest signature varieties in each state for the condition indicated. The main listing of National Banks is alphabetically by states and numerically by charter numbers, thus forming a chronological arrangement of banking within the states.

Since the second edition of this volume in 1955, there has been an upsurge in all numismatic fields. U. S. paper money is no exception and valuations throughout the entire series indicate as much. Increased collector interest naturally brings on increased prices for all but the most common notes.

That Robert Friedberg's work is the standard is more and more evident with the passage of time. Readers of advertisements in current numismatic publications find most of the paper money is described solely by the Friedberg number or by the number and a very brief description. — ELSTON G. BRADFIELD

"Monies in Circulation": Part II of the official publication of the International Criminal Police Organization (Interpol), General Secretariat, Paris, France, published by Les Systemes Keesing, Amsterdam, The Netherlands; looseleaf changes periodically, more than a thousand pages, royal octavo (about 7" by 10 1/4"). Initial subscription of \$27.50 includes the basic manual plus change sheets for a year. Renewal subscriptions \$17.50. Air mail service, \$1.70 extra. Remittances should be made payable to Les Systemes Keesing and mailed to the exclusive United States representatives, Numismatic Company of America, P. O. Box 711, Springfield, N. J.

This is a most unusual service, never before offered outside police ranks, that is now available to coin collectors. Designed specifically for the International Criminal Police Organization, it presents information on coins and paper money currently circulating in more than a hundred and twenty-five countries. Some countries and colonies now

missing will be added in 1960. Each note is illustrated (reduced) and described as to exact size and colors. Each coin is shown exact size and described as to metallic content, weight and diameter.

Over three thousand halftones of good quality are used. Banknotes and coins are pictured in both obverse and reverse. Common gold

coins of the world still circulating in Europe are pictured and described. Above a thousand pages of heavy gloss paper in gold stamped heavy black mechanical looseleaf binder make up the basic manual. The text is in four languages: English, French, German, Spanish.

Entries follow this style (Reference here is to the Austrian five groschen):

5 GROSCHEN

Diametre/Diameter/Durchmesser/

Diametro: 19 mm.

Poids/Weight/Gewicht/Peso: 2.500 g.

Alliage: zinc

Legierung: Zink

Aleacion: zinc

New sheets, issued from time to time as changes occur, keep subscribers fully informed as to new coins and paper money.

The work is very useful to international law enforcement agencies, since each coin's denomination, diameter, weight and metal and each note's denomination, size in millimeters, watermark and dominant colors are given. Details such as

mintmarks, place of minting (or printing), number of pieces struck (or printed), varieties, rarities, date of first issue, numismatic descriptions of legends and symbols, designer's name, etc., which are of interest to coin collectors and dealers, are missing. Each collector must, therefore, decide for himself as to the probable usefulness of this service to him.

This reviewer feels, however, that many specialists in foreign coins and paper money, all full-time dealers and a goodly number of "vest pocket" operators, larger coin clubs, larger public libraries, metropolitan banks and those in export-import centers, foreign exchange merchants and perhaps financial editors or editors of major numismatic publications may gain assurance and authority by taking advantage of this offer. The price is not high for the man who can use this service but, conversely, the price is no bargain to one who intends to place the volume on the shelf merely to impress his friends with the "completeness" of his numismatic library. — ELSTON G. BRADFELD

"The United States Trade Dollar — America's only Unwanted, Unhonored Coin" by John M. Willem, Jr. Library edition of one thousand copies, plus five hundred copies autographed and serially numbered. Privately printed, 1959, by Marchbanks Press, New York; copyrighted and sold at \$10 by the author, 1120 Fifth Ave., New York 28, N. Y., cloth, xiv + 194 pp. 9" x 6", illus., tables, 86-item bibliography, index.

Because a book of this kind has a double appeal, both as a distinct contribution to the monetary history of the United States and as a numismatic work of the first water, we were fortunate to secure reviewers highly competent in the two fields.

Dr. Neil Carothers, who reviews the book from an economic and monetary standpoint, is a renowned economist, scholar and teacher, now Dean Emeritus of Lehigh University. One of his books, *Fractional Money*, published in 1930, is a rarity always included in anyone's list of the top ten numismatic books concerning coins and paper currency of the United States.

Raymond H. Williamson, Lynchburg, Va., reviews the book as it applies to American numismatics. He is well known to readers of *The Numismatist* for his numerous contributions on historic phases of coins and tokens of the United States. — THE EDITOR

Review by Dr. Neil Carothers

The author, on the title page, describes the trade dollar as "America's only unhonored, unwanted coin." It is an apt description. The trade dollar was also our mystery coin. Its origin and its purpose were shrouded in obscurity.

In this reviewer's history of the silver coinage of the United States the story of the trade dollar was confined to a summary of the known facts, that it was conceived in doubtful circumstances, legalized in confusion and ignorance, employed in

evil ways, and outlawed in ignominy. The author of this new book, John Willem, set out to gather all the facts about this strange chapter in our currency history and to present those facts in a final history. He has succeeded admirably.

In the background of the trade dollar there were the endless absorption of silver by China, the flow of silver from American mines and the conscienceless demagogues in our government working to promote the price of silver. The unanswered questions the author undertook to answer were many. Who first proposed the trade dollar? Was it created to compete with the Mexican dollar in trade with China? Or to provide an unlimited market for an over-supply of silver? What hidden influences made the coin legal tender in domestic trade, in which it could only be harmful?

These and other questions are answered as well as they can ever be answered. In some cases the author can only speculate as to the motives of some of the persons involved. These personalities are viv-

idly described. There are also rare photographs.

There is accurate analysis of the economic forces at work, not only in the United States but also in China and Europe. There is a revealing narrative of the Congressional floundering which resulted in the vitally important Act of 1873. The history of the trade dollar from this Act to its painful death in 1887 is presented with a wealth of detail. The author dredged up from the past an extraordinary volume of documents and contemporary records.

There is avoidance of praise and blame. The author was writing a history, not a polemic. Wisely, he leaves to the reader the judgment of men and measures, and the intelligent reader will see in this history one more example of the ignorance and demagoguery which have marked our currency legislation and administration from the first law of 1792 to President F. D. Roosevelt's abject surrender to the wolfish silver interests in 1934.

John Willem undertook a very difficult task. He did a splendid job.
—DR. NEIL CAROTHERS

Review by Raymond H. Williamson

The literature of coin collecting in the United States is coming of age. Crosby, Carothers, Sheldon, Breen, Newman and now Willem have all made scholarly contributions to the literature of our authorized coinages.

Willem's work is sophisticated, breezy and easy to read, yet it is based on research in depth with sources well indicated. The author's style is lucid and incisive, the printing is excellent and the plates are of best halftone quality.

Collectors of United States coins will find rewarding material on every page. Particularly stimulating is the 20-page Chapter XI: "Types and Collections of Trade Dollars." Willem illustrates and describes major trade dollar patterns and the adopted design. He provides coinage tables for business strikes and proofs, mint by mint and month by month. A page is devoted to the probably illegitimate proof trade

dollars dated 1884 and 1885.

The author identifies mintmarks and suggests that rarities are probably due to small issues, exportation, mutilation, etc. He explains Chinese chop marks but wisely refrains from the minutiae of die varieties and die states, since the machine-made dies are almost identical. As a frame of reference, Willem gives history and illustrations of other trade dollars, particularly those competing with the U. S. coin in the Orient.

While critical comments are customary in a book review, none of importance is offered. We can understand the necessity of the author's use of halftone illustrations, with their inherent loss of finest detail. Occasionally a source is identified but vaguely. Mint machinery of the period could have been covered. The index (but not the text) omits such key "finding words" as "rarity," "dies," "proofs," and "designers." But these omissions are trivia when

compared to the tremendous amount of accurate and interesting data which are included.

Willem's book is definitive and represents tremendous applied effort. He visited museums, archives, libraries and authors. He carried on a terrific correspondence. His enthusiasm persuaded others to help in his searches for information. A vice president of J. Walter Thompson Co., leading advertising agency in the world, he worked on the manuscript at odd moments during his many business trips. His home was near Chicago until mid-1958. Willem worked "seriously" on his book only about four years — seemingly a speed record for such a result on an avocation basis.

Willem once told this reviewer: "I started this thing out of sheer curiosity. The subject of the trade dollar simply intrigued me, and I wanted to know more about it. The

more I probed, the more interesting the subject became, but it also increased the difficulty of separating emotion from fact. . . . Apparently the subject of the Trade Dollar and the standard dollar as related to the period of 1870 to 1887 and beyond seems to sweep writers into something resembling a frenzy. Very strong opinions are developed and stated in very forceful terms."

A surge of collector interest in trade dollars is now easily predictable, because the pleasures of collecting are so much enhanced by the story behind the coin now available for the first time in Willem's *The United States Trade Dollar — America's Only Unwanted, Unhonored Coin*. Only yesterday, even uncirculated specimens of the demonetized "unwanted, unhonored" trade dollars were selling below face value. Those days are gone forever. —RAYMOND H. WILLIAMSON

"Israel's Money, A Catalogue of the Coins, Medals and Bank Notes Issued in the State of Israel 1948-1959," by Leo Kadman, publication of the Israel Numismatic Society, Numismatic Studies and Researches, Vol. III, Schocken Publishing House, Tel-Aviv and Jerusalem, 1959, 52 pp., paper cover, \$2.75.

When the British withdrew from Palestine May 15, 1948, the new State of Israel came into being and found herself without adequate media of exchange. Prior to that, notes of the Palestine Currency Board had circulated in the area from 1927 to 1948. Legal basis for Israel's currency did not come until the passage of the bank note law of August 17, 1948, under which three different series of bank notes have since been issued.

Coinage began in 1948 with a 25 mils coin in aluminum struck in a local factory. The coins were so poorly made the government decided not to release them. Shortage of small change, however, forced their issuance temporarily.

The author of this book under review is Leo Kadman of the Israel Numismatic Society, Tel-Aviv, Israel, who has had much to do with the monetary issues of his country. He is fully qualified to present the account contained in his book. Textual matter describes the obverses

and reverses of all coins and medals, their metallic content, sizes, weights, dates of issue. Information on the paper money includes the name of the issuing agency, where printed, whether or not the notes bear a date or watermark, dates placed in circulation and, conversely, dates of withdrawal, colors, sizes, signatures, serial numbers and descriptions of both sides of the notes. Illustrations are good.

There is no indication of the numbers of coins or notes made nor is there any attempt at a table of rarity. No prices are given. A table of Hebrew dates, denominations and legends with translations is useful.

The monetary story of the new Israel is well told in this booklet, which is recommended to collectors of that country's coins, medals and paper money. The cost is low enough, too, for the volume to be included in both general numismatic libraries and also public libraries. —ELSTON G. BRADFELD.

For the first time, a complete record of all old series issues of paper currency and the amount still outstanding is offered to numismatists

UNREDEEMED LARGE SIZE NOTES

By

NATHAN GOLD, A.N.A. No. 22039

"HOW much of this 'stuff' is still around?" That is a question many people ask while viewing a display of large size United States paper money. Value of notes permanently lost or destroyed while in circulation is of course unknown. However, Treasury Department records indicate that over \$142 million in large size notes are still unredeemed.

"Blanket size" bills used by our fathers and grandfathers are now considered to be antiques. The showing of one of them will usually attract more attention among non-collectors than many choice or rare coins.

They have become a forgotten or unknown medium of exchange, although thirty years ago only large size notes were in use. Current small size notes were first issued July 10, 1929, and thereafter large size notes tendered at banks were redeemed and destroyed. The amounts still outstanding are, therefore, of numismatic interest.

The Treasury Department issues a monthly report, "Circulation Statement of United States Money," listing by denominations the amounts of the seven classes of paper money still considered in circulation. The seven classes are: Federal Reserve Notes, Silver Certificates, United States Notes still currently issued, Gold Certificates, National Bank Notes, Federal Reserve Bank Notes,

and Treasury Notes of 1890, all of which are in the process of retirement. Demand Notes of 1861 and Fractional Currency are no longer figured as being in circulation but the amounts outstanding are included in the national debt total as noninterest bearing obligation.

Through the coöperation and assistance of the Secretary of the Treasury, Robert B. Anderson, and O. N. Todd, Administrative Assistant to the Treasurer, whose help I wish to acknowledge, a detailed account of outstanding large size notes was made available. The amounts include the unredeemed part payment for damaged notes. This results in odd totals listed for some denominations. Also supplied was the total amount of each class of notes issued.

Records now kept by the Treasury Department of each class of notes are separated into two accounts. Large size notes, all issued prior to 1929, are listed and called "old series." Small size notes, issued first as Series of 1928, and all series thereafter, are listed as "new series." These being the official designations, collectors should probably use these terms when referring to the two size notes.

This is probably the first time, numismatically, a complete record of all the old series United States currency issued and still outstanding has ever been reported. Com-

Nathan Gold, Cleveland, Ohio, is a specialist in U. S. paper money. During the last year he has spent considerable time in Washington, D. C., doing research on his favorite subject at the National Archives, Bureau of Engraving and Printing and other primary sources of information.

parison of amounts and percentages should help ascertain the probable rarities and scarcities of some types. Although in dollar amounts the amount of unredeemed notes is large, percentage wise it is less than one-fifth of one per cent of the total issued. Based on the number currently being redeemed and those held in collections, probably 75% of the remainder has been permanently lost or destroyed while in circulation.

A report in *The Numismatist*, August, 1929, page 493, as of May 31, just prior of issuance of small size notes, lists the amounts then in circulation. Less than seven per cent of the aggregate amount of \$5,020,768,159 are still unredeemed. In the September, 1931 issue, page 628, a report as of April, 1931, nearly

two years later, stated that a total value of only \$724,780,861 in large size notes were still outstanding and consisted of 95,581,861 pieces. These two reports indicate that over 85.5% of the 1929 amount had been redeemed during that short time.

A total of \$142,289,119 was still outstanding as of June 30, 1959. This is about two and three-quarter per cent of the 1929 total and less than 20% of the 1931 total. During the past fiscal year a total of \$708,615 were redeemed. In 1958, \$920,068 in old series notes were redeemed.

In the schedules of each class of notes will be found the totals issued by denominations still outstanding, amounts redeemed July 1, 1958 to June 30, 1959 and estimate of approximate number of pieces unredeemed.

GOLD CERTIFICATES

Total Issued:	\$13,447,187,300
Unredeemed May 31, 1929:	1,423,928,600
Unredeemed June 30, 1959:	18,310,454
Redeemed 1958-1959:	231,870

Numismatically, Gold Certificates receive little attention among collectors as a result of the Gold Act of 1934, which actually prohibits their possession. Being noncollectible, information regarding them has been neglected. Also being issued only in the large denominations of \$10 to \$10,000 very few attempted to assemble a collection of them, most collectors being interested only in \$1, \$2, and \$5 notes because of the large investment involved.

Over 99.86% of the amount issued has been redeemed and almost 98.72% of that out in 1929 has also been turned in. The Treasury Department still maintains as a reserve in gold bullion a value at the legal standard equal to the face amount of Gold Certificates unredeemed. Of the outstanding note apparently less was destroyed while in circulation than any other classes. It appears they are being hoarded in hopes of redemption at some future date in gold coins. Uselessly, as all of the old standard weight gold coins have been melted.

Surprising is the large amount turned in during the past fiscal year which represents about one third of value of all old series notes redeemed. Among the total redeemed last year were eleven of the \$1,000s, twenty-four of the \$500s, and 459 of the \$100s. In addition, \$524,700 in small size Gold Certificates were also redeemed. Much of this may be from foreign held hoards.

Last year, while in Washington, I witnessed the checking of \$22,300 in Gold Certificates, Series 1882, part of a hoard actually found in the proverbial mattress at Hammond, La. Noticing that balances of old series notes were still maintained by the Treasury Department, I obtained permission to copy records which form basis of this article.

SILVER CERTIFICATES

Total Issued:	\$12,374,855,800
Unredeemed May 31, 1929:	467,605,163
Unredeemed June 30, 1959:	29,992,755
Redeemed 1958-1959:	16,177

Silver Certificates currently outstanding in the old series are less than a quarter of one per cent of the total dollar amount issued. Less than six and two-fifths per cent of the 1929 amount outstanding are unredeemed. During year ending June 30, 1959 a total value of only \$22,283 was redeemed of which \$16,177 were of the \$1 denominations.

Silver Certificate, Series of 1899

The \$1 bills represent almost 53% of the total value issued and almost 63% of the total value still outstanding. They also are over 87% of the number of pieces still outstanding in large size Silver Certificates.

Since small size notes have only been issued in \$1, \$5, and \$10 values, the future redemption of other denominations can be easily noted in the monthly Treasury Department reports.

An interesting article on Series of 1896 (known numismatically as the popular "Educational Set") by Thomas F. Morris was published in *The Numismatist*, June, 1934, page 367.

TREASURY NOTES OF 1890

Total Issued:	\$447,435,000
Unredeemed May 31, 1929:	1,286,050
Unredeemed June 30, 1929:	1,142,984
Redeemed 1958-1959:	197

Treasury Notes of 1890, known numismatically also as Coin Notes, include the Series of 1891. These were last issued in 1898 and have been in process of redemption since then. Most had already been redeemed by 1929 and only \$143,066 or a little more than 11% then outstanding has since been redeemed. Only a quarter per cent of the total issued is still outstanding.

During the last fiscal year only \$197 was turned in. This consisted of three \$1s, two 2s, ten 5s, ten 10s, and two 20s.

As a class they are undoubtedly the scarcest and rarest of all large size notes and prized highly by collectors. W. A. Philpott Jr.'s article (*Numismatist*, Dec., 1951, page 1282) is an excellent reference regarding them.

UNITED STATES NOTES

Total Issued:	\$8,903,427,808
Unredeemed May 31, 1929:	346,681,016
Unredeemed June 30, 1959:	24,299,409
Redeemed 1958-1959:	26,964

This class includes the Treasury Notes issued from 1862 to 1869. Thereafter they were called United States Notes. Under the Act of May 31, 1878, the total amount outstanding is limited to the sum of \$346,681,016, the amount shown outstanding in 1929. The Treasury Department reissues daily an amount equal to that turned in for redemption.

Of the total \$8.9 billion issued, about 99.77% has been redeemed. Only about seven per cent of the authorized total outstanding in 1929 is still unredeemed. Included in the \$26,964 redeemed during the past fiscal year were one each of the \$1,000, \$500, and \$100 notes and eleven of the \$50s.

United States Note, Series of 1917

Also, 1,980 of the \$1s and 419 of the 2s were turned in. All of the \$10,000 and \$5,000 notes issued have been redeemed.

FEDERAL RESERVE NOTES

Total Issued:	\$23,738,946,680
Unredeemed May 31, 1929:	2,072,241,965
Unredeemed June 30, 1959:	37,082,395
Redeemed 1958-1959:	359,720

Federal Reserve Notes comprise the highest dollar total both in amounts issued and unredeemed. Although only issued from 1914 to 1929, they totaled over 32% of the value of all old series notes issued since 1862. Over 26% of the current total still outstanding are Federal Reserve Notes. Of the amount issued, over 99.84% have been redeemed and more than 98.2% outstanding in 1929 are now redeemed. During the past fiscal year the total of \$359,720 redeemed was more than 50% of total value of all old series notes redeemed. *The Numismatist*, November, 1952, page 1074, has an excellent account by William A. Philpott Jr. on the scarcities of the varieties issued by each of the twelve banks.

FEDERAL RESERVE BANK NOTES

Total Issued:	\$761,944,000
Unredeemed May 31, 1929:	3,711,131
Unredeemed June 30, 1959:	2,099,444
Redeemed 1958-1959:	1,679

Old series Federal Reserve Bank Notes were issued from 1915 to 1921 and have been in process of redemption since then. Only a half per cent

Federal Reserve Bank Note, Series of 1918

of total issue was outstanding in 1929 of which 40.7% has since been redeemed, leaving a little more than a quarter per cent of the original issue still outstanding.

During the last year a total of \$1,679 was redeemed of which 402 were \$1s and 196 being \$2s. None of the 57 outstanding \$50s was turned in.

Only \$60,489 has been redeemed since October 31, 1944. Until then Treasury records were kept for each of the twelve Federal Reserve Banks. Since that date all banks have been grouped together for the unredeemed totals of each denomination. They are now considered as a noninterest bearing debt of the government.

The article by W. A. Philpott Jr. (*Numismatist*, August, 1951, page 818) is an excellent reference as to scarcity of the various notes of each Federal Reserve Bank.

NATIONAL BANK NOTES

Total Issued	\$14,081,209,155
Unredeemed May 31, 1929	705,314,234
Unredeemed June 30, 1959.....	29,361,678
Redeemed 1958-1959	65,902

National Bank Notes are a favorite among collectors because of the extensive type varieties issued for the many individual banks in the various series. The amount issued, \$14,081,209,155, is second highest among the classes of old series currency. During the last year a total of \$65,902 was redeemed of which only twelve of the "Lazy Two's" and forty-eight of the \$1 bills were turned in.

Almost 99.80% issued and about 95.3% in circulation in 1929 have been redeemed. In 1936, a year after the class was discontinued, a total value of \$43,308,980 in large size notes and \$328,910,685 in small size notes were outstanding. During the last year, for the first time, the amount of outstanding large size notes is greater than the small size notes. A total of \$2,106,790 small size notes were redeemed, leaving a balance of \$28,370,772 almost \$1 million less than large size notes.

The calling for redemption, July 1, 1935, of the United States bonds payable in gold, the only type of bonds allowable for security of National Bank Notes, automatically cancelled privilege of National Banks to issue currency. Payment for outstanding notes made by the banks was turned into the general funds of the Treasury Department and notes are now classified as a non-interest bearing debt without any specific security.

W. H. Dillistin's book, *A Descriptive History of National Bank Notes*, (1956) is an excellent reference to past redemption and probable scarcity. Robert Friedberg's third edition (1959) of *Paper Money of the United States* contains valuable information on National Bank Notes not previously reported.

DEMAND NOTES OF 1861

As previously mentioned, Demand Notes of 1861 are no longer considered as being in circulation. However, records are maintained separately by the Treasury Department which show that \$52,917.50 is still outstanding. This consists of \$21,192.50 in \$5s, \$19,625 in \$10s, and \$12,100 in \$20s. (The odd total in \$5s is the result of partial redemption of damaged notes.) None was redeemed during the last year. The authorized issue totaled \$60,000,000.

FRACTIONAL CURRENCY

Total Issued	\$368,724,079.45
Unredeemed June 30, 1914	15,228,411.23
Unredeemed 1933 (estimated)	1,989,300.00
Unredeemed June 30, 1959	1,965,808.76

The above totals are interesting to complete the record of all United States paper money issued prior to 1929 and still outstanding. They are no longer considered as being in circulation.

The article by B. G. Lowenstam, *The Numismatist*, May, 1933, page 316, gives a complete record of various issues and denominations of each issued and redeemed at that time.

A.N.A. 1960 Convention

PLANS

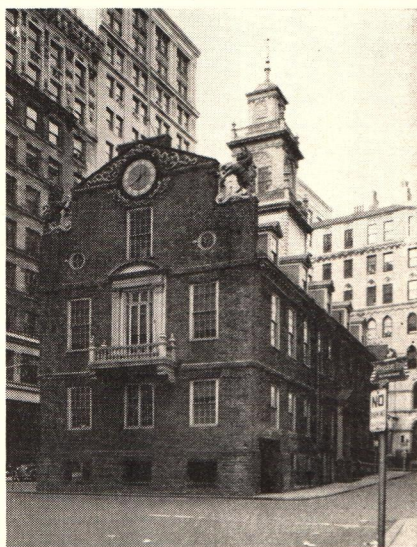

Final plans for the sixty-ninth annual convention of the American Numismatic Association to be held in Boston, starting August 26, 1960, are now being formulated. A grand welcome, in air conditioned comfort, is planned in conjunction with the one hundredth anniversary of the Boston Numismatic Society.

Boston has many points of numismatic interest. The convention committee has arranged for numismatic exhibits at the Fogg Art Museum of Harvard University, the Boston Museum of Fine Arts, the New England Historical and Genealogical Society and the Massachusetts Historical Society. The latter houses the famous Appleton collection which, because of its breadth, cannot be shown in entirety, but selections from it may be seen. An exhibit of rare books on numismatics will be shown at Boston Athenaeum.

Naturally, all these museums have other fine exhibits. The famous "Washington Before Boston" medal in gold, housed in the Boston Public Library, may be viewed. Tours to other famous Boston attractions, such as the old North Church, Paul Revere's house, the old State House, Bunker Hill, the Saugus Iron Works (the oldest in America where the dies for some of the New England silver coinage were made) and the unique Isabella Stewart Gardner Museum. Of course, the varied eating establishments of Boston are famous.

Minute Man. This statue may be seen by the visitor to Greater Boston when he journeys to Concord to visit the scene of "the first shot that was heard 'round the world."

Old State House. Here the first Town House was built in 1657 in the earliest market place of Boston. The present structure was built in 1713, burned in 1747, and immediately rebuilt with walls of the former building.

The "host" hotel is the centrally located Statler-Hilton Hotel, which is fully air conditioned. Average room prices are singles \$12.50, twin-bed rooms at \$19.00 and double rooms \$17.00. Make your reservations early directly through the hotel.

A large bourse under the direction of William J. Dodds, Box 215, Astor Station, Boston 23, Mass., is planned. Hurry—only a few openings left.

To reserve exhibit space contact the chairman, Edward M. Perkins, 115 Train St., Dorchester, Mass. Don't forget the fine exhibit awards for excellence awarded at the national convention.

A beautiful medal commemorating the convention and the B.N.S.'s one hundredth anniversary will be issued in gold, silver, and bronze. For further information, contact Percy M. Rideout, 520 Commonwealth Ave., Boston, Massachusetts.

The convention committee, under the chairmanship of James F. Clapp, Jr., is looking forward to greeting collectors from all over the world for the largest coin convention ever at the "hub" of the universe.

NATIONAL COIN WEEK, APRIL 24-30

Theme: *Why it pays to be a numismatist*

For those who have not made any plans for National Coin Week, there are several weeks remaining to make an effort to participate. Entry blanks and other material are now in the hands of club secretaries. Individuals who have not received this material should write to their General Chairman.

Publicity about this event will be sent to major newspapers through the Associated Press. Individual members and clubs can arrange for local publicity by giving information about their displays to your local editor and to radio and TV stations. Such publicity counts for points.

All entries should be mailed to National Coin Week Awards Chairman, Mark Donner, 3131 Western Ave., Seattle, Wash. The deadline for mailing entries is the midnight postmark of May 31.

Good luck from your 1960 chairman.

SILVER ALLOCATED FOR THE FIVE CENT SILVER-COPPER-MANGANESE COIN

Transactions for the fiscal years 1943 through 1946

The five-cent coin, popularly known as the "nickel," is normally composed of 75 percent copper and 25 percent nickel. During the war period, however, these metals were needed for war production and it became necessary for the Mints to employ different alloys. Title XII of the Second War Powers Act of Mar. 27, 1942 (56 Stat. 174,184), authorized the use of silver in the five-cent denomination. The standard weight of the coin remained at 77.16 grains and the alloy adopted was composed of 35 percent silver, 56 percent copper and 9 percent manganese. This alloy was used only from Oct. 1, 1942 to Dec. 31, 1945, after which the regular cupro-nickel alloy was resumed.

Commemorative Medals

Two bills calling for commemorative medals, S. 2454 (Pony Express medals) and S. 2431 (Kansas Centennial medals) have passed the Senate and are before the House of Representatives as this is written. Since passage may occur before our next issue, here are the addresses of the distributing agencies so that interested collectors may make contact:

Pony Express medal, of not less than two thousand nor more than five hundred thousand before December 31, 1961, write Edwin H. Burgess, Chairman of the Numismatic Commission of the National Pony Express Centennial Assn., 3700 N. Charles St., Baltimore, Md. Col. Waddell F. Smith, 75 Margarita Dr., San Rafael, Calif., is the Association president.

Kansas Centennial medal, from twenty-five hundred to not more than twenty thousand before December 31, 1961, write Maurice E. Fager, Chairman of the Kansas Centennial Commission, 801 Harrison St., Topeka, Kansas.

The West Virginia medal probably will not be struck before 1962 but those who desire advance information may inquire of Charles Hodel, Chairman of the West Virginia Centennial Commission, Room Four, Charleston 5, W. Va.

[Editor's note: The House of Representatives passed S. 2454 and S. 2431 on March 7 and both are thus cleared for President Eisenhower's action. How soon the pieces, if authorized, would be struck is not known at this time. Information should be obtainable from the Kansas and Pony Express commissions given above.]

Comments on Commemorative Medals Editorial

Dear Mr. Bradfield:

I want to take time out from this busy life to compliment you on your editorial in the February issue of *The Numismatist*, "Numismatists Forgotten in Medal Sales." I believe that the true red blooded coin collector is a forgotten man. Somehow in the last two or three years the sharpies and fish peddlers have gotten control of all the recent issues of rolled money and medals. I had more trouble buying two 1958-P Jefferson nickels for our collection than I had completing an 1870 proof set. I am looking forward to seeing something done about this in the very near future. Keep up the good work.

Dear Mr. Bradfield:

I read with much interest your editorial, "Numismatists Forgotten in Medal Sales." I am very much in accord with your views that a better distribution system should be used, although I do not think that more copies should be struck. Should more copies be struck now, those who have purchased these two already issued pieces would be hit hard (myself included). I think what has been done with these issues should be left as is, but future issues should be handled differently.

I was able to get a copy of the "Rush to the Rockies" centennial piece for the original issue price of \$3.50. But I consider myself lucky, as many of the collectors with whom I correspond were unable to get copies for that price, even though I let them know right away. On the Nevada Silver Centennial piece I was not nearly as lucky. After about two months of writing innumerable letters,

I was finally able to obtain a copy for only (ha!) \$15.00. The next closest offer was \$20.00.

Dear Sir:

Thanks for your editorial on medal sales. Surely hope Congress breaks up this racket and orders the commissions to authorize Mint to issue additional ones.

Dear Sir:

From information I have, you must have been terribly misinformed or very neglectful in checking before writing such an editorial.

— HARRY SCHILLING

Springfield Gardens, N. Y.

[Editor's note: Every statement made in our editorial is true. The postal you received from the Secretary of the Nevada Commission claimed news releases had been sent out by the Commission and the U. S. Mint. If so, none ever reached *The Numismatist* or, so far as we know, any other numismatic publication.]

"Coin World" Seeks Coin Week News, Photos

Books for the Philippines

Dear Mr. Bradfield:

I hope Mr. McArthur has better luck with his job for a library for the Philippines than I did. After the war I tried to get donations, agreeing to pay transportation to Manila. *The Numismatist* was very luke warm and donations few and rather unimportant. However, I did send two or three hundred pounds of *Numismatists*, books and other magazines to Mr. Perez for the library right after parcel post was resumed. These were mostly books I had in duplicate and seemed to fill a need there at the time. There was none of the more expensive items as I had none and none was donated.

Might I suggest that the effort be combined with other numismatic magazines. A joint program could be set up through clubs rather than leave it to voluntary contributions of individuals.

I had many letters back and forth with Mr. Perez before and after the war and it was a shock to learn of his death. He must have been quite a leader over there and sure was nice to me.

CENTRAL STATES CONVENTION

Many collectors from all parts of the country are planning to attend one of the largest numismatic events of the year, the Central States Numismatic Society convention to be held in Detroit, Mich. Although the principal activities of the Central States Numismatic Society are conducted in the thirteen-state midwest area, numismatists from all parts of the United States and Canada will be present. A very brief summary of the activities follow:

Time: April 29-30 and May 1.

Place: Entire fourth floor of Detroit's beautiful Sheraton-Cadillac Hotel.

Host: Detroit Coin Club, organized 1924.

Hotel Reservations: Hotel reservations should be made immediately. The hotel management guarantees that all confirmed room reservations will be honored. The Central States convention should be mentioned in applying for reservations to obtain special rates.

Bourse: There will be a very large and active bourse in which eighty-two dealers from all parts of the United States and from Canada will participate.

Exhibits: Beautiful, large first-place trophies will be awarded in eight classifications and a best-in-the-show trophy will be given to one of the first-place winners. Ribbons for second and third places and honorable mention will be awarded where the number of entries so warrant. Exhibitors in competition are required to be members of the Central States Numismatic Society or a club affiliated with the latter. The exhibit rules and application should be obtained immediately from Exhibits Chairman, Henry R. Burns, 15486 Auburn, Detroit 23, Mich.

Auction: A three-session auction to be conducted by French's will offer a vast array of numismatic material, including outstanding rarities as well as items which will be of interest to all collectors.

Ladies' Activities: Entertainment will be provided for all ladies who register and will include the following activities:

(1) Friday, April 29, 2 p.m.: A visit will be made to the Money Museum in the new main office building of the National Bank of Detroit, which is within a short walking distance from the Sheraton-Cadillac Hotel. The ladies will be greeted by Rear Admiral Oscar H. Dodson, Director of the Museum and A.N.A. President. (The museum, which houses one of the country's largest and finest numismatic exhibits, will of course be an added attraction for the men. Tours will be conducted on both Friday and Saturday.)

(2) Friday, April 29, 7:30 p.m.: Bingo games will be conducted for the ladies in the Normandy Room of the hotel. Very desirable prizes will be given and refreshments will be served.

(3) Saturday, April 30, 12 noon: The Detroit Coin Club will provide a luncheon for the ladies in the private dining room of the J. L. Hudson Company. Favors and door prizes will be given.

Banquet and Entertainment: The banquet will be held in the hotel's beautiful Book Casino Room. The menu will meet with the approval of everyone and an enjoyable program is planned including entertainment, door prizes, mementos for the ladies and the awarding of exhibit trophies and ribbons.

Convention Journal: There will be an interesting and informative convention journal, containing no advertising other than patrons' listings. Patrons are entitled to three lines in the Journal in return for a donation of \$2.00. Patrons may submit any suitable personal or business item to the General Chairman accompanied by a check in the amount of \$2.00 payable to Detroit Coin Club.

New A. N. A. Slide Set

The Edward T. Newell Visual Education Committee under the chairmanship of John J. Pittman has just produced its latest slide set entitled "Regular Issue Odd-Shaped Coins of the Twentieth Century." This set consists of eighteen slides of coins which fall into three principal categories: Irregular shape without definite pattern, angular with four or more sides, scalloped edges varying in the number and arrangement of the projections. "Regular Issue Odd-Shaped Coins of the Twentieth Century" is an interesting addition to the A.N.A. series, now consisting of twenty-two separate subjects. A complete list of slides along with instructions for borrowing may be obtained by writing to the slide custodian, Michael M. Dolnick, 6720 N. Seeley Ave., Chicago 45, Ill.

Another development in the A.N.A. slide series is the production of a taped commentary to accompany slide set No. 10, "Confederate States of America Currency." The tape was produced under the supervision of committee member Jack Koch of Moses Lake, Wash. Clubs having tape recorders available and who wish to show this set with the taped commentary should send request to the slide custodian.

Heart of America Numismatic Association took in twelve new members at its February 16 meeting, and still looks forward to a membership of six hundred by the year end. (Los Angeles, take note.) Ray Lefman reported that space has been reserved in the Hotel Muehlbach for the Midwest Coin Fair November 26 and 27. A panel consisting of Vic Hill, Jack Klausen, Ray Lefman and John Maxim answered many pertinent questions from the floor and discussed the real pleasures of being a numismatist. The consensus was summed up thus: Collect it, keep it, and study it. Don't judge a coin by what it cost or what you can get for it, but rather by its history, where it fits into collecting

and how much pleasure it affords you. In other words, be a numismatist instead of a speculator for real and lasting benefits. — DAVE HOCHBERG, Pub. Chn.

ADVERTISERS PLEASE NOTE ALL FOLLOWING CONDITIONS

All correspondence relating to advertising should be addressed to the Advertising Manager, S. W. Freeman, P. O. Box 591, Newport, Ark. Make all remittances payable to the American Numismatic Association.

Advertising Contracts: These are available, covering periods of three, six and twelve consecutive months for display space as listed in the above Table of Rates, and are necessary if the schedule of reduced rates is to apply. If the advertiser prefers not to accept the Contract, such reduced rates will be granted only upon payment in advance for the period desired.

References: All advertisers who submit copy for the first time are definitely requested to furnish therewith banking or other satisfactory references.

Available Space Units: Practical considerations restrict the allocation of space units to those listed in the above table. Any amount of space (subject to any current limitation) is available IF these units or a combination of them are used. Unless contrary instructions are given, copy will be cut if found too full for the space designated; if no designation is made, it shall be understood the amount of space is left to the discretion of the Advertising Manager.

Unless under contract, smaller units than one-half page accepted subject to available space in desired issue.

Deadline: Copy must be received by the Advertising Manager by the 7th of the month to insure insertion in the following month's issue.

Illustrations: All cuts to be provided by the advertisers, care being used to see that they do not exceed in measurement the limits of the space unit desired. The Advertising Manager will, when requested, have suitable cuts made from furnished photographs.

We cannot accept mats.

Miscellaneous: Please furnish copy separately from your letter of transmittal. Advertising copy included in the body of a letter usually has to be retyped for the printer; this should not be required. **Mail Bid Sales listing not acceptable.** It is also the policy of the magazine to limit its advertisements to those of numismatic character.

Preparation of Copy: Advertising copy should be prepared with minute care. Carelessness invites error—something which both advertiser and publisher are anxious to avoid. Use only one side of the sheet. Send originals, not carbon copies. Use only paper of good quality, and not of extremely light weight.

In the absence of an Advertising Contract, when payment in advance for any number of consecutive months has been made, if change of copy has not been received by the 7th of the month for the next issue, the latest preceding advertisement will be run.

Advertisers may use a trade name, but, except in the case of an incorporated concern, the name of the proprietor or some other responsible person connected with the firm must also appear in the advertisement.

The right to edit copy, to require payment in advance, and to decline any advertisement is specifically reserved.

THE NEW MEHLCO QUOTE SHEET

is now being released regularly, every week. Monthly quotations are useless in this active market. You must keep informed with up-to-the-minute market values on all rolls of uncirculated coins.

THE MEHLCO QUOTE SHEET will serve this purpose. It is mailed to you by fast **FIRST-CLASS MAIL** each and every week with up-to-the-minute market values.

"The Quote Sheet is terrific! It has already paid for itself by giving me the price on the 1955-D dimes," writes one subscriber.

Another subscriber writes, "Now I won't hesitate to buy, seeing that there are real BID prices."

Still another, "Ordering from — has been disappointing. The dealer is always sold out and the price is always higher each month. This weekly news is swell."

Yes, dealers, collectors and investors are all subscribing. You must, too. An Annual Subscription at \$12.50 will insure your getting the up-to-the-minute market values each and every week by **FIRST-CLASS MAIL** delivered right to your door. A 3-month trial subscription is only \$5.00. A sample copy — 35 cents.

Don't Delay — do it today. The first issue will pay for more than the annual cost — and you will continue to benefit each and every week of the year.

Send your subscription **TODAY!** Pay later if you wish but subscribe **TODAY** and get the information you need at once.

A NEW KIND OF COIN ALBUM

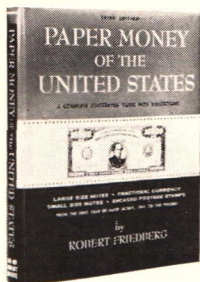

The Library of Coins

Complete visibility and complete protection, the two most-wanted features of a coin album, are presented for the first time by *The Library of Coins*. Bound like books, handsome and compact, each Library of Coins volume displays and protects its coins between two sliding panels of clear, tough plastic. Each coin "porthole" has printed next to it full data on mint mark and quantity minted. Each volume contains a brief background story on the coins, giving both the novice and advanced collector helpful information, including a listing of the rare dates.

Measuring $8\frac{1}{4} \times 6\frac{1}{4}$ ", the volumes are low priced, sturdily manufactured, and permanently bound in a variety of identifying colors for the various denominations. Their compact size permits the storing of a large coin collection in very small space. Backbones are clearly gold stamped so that they are as readily identifiable as are books.

The Library of Coins represents the first major innovation in high grade coin albums in more than 30 years, and was several years in development. Designed by numismatists, the Library of Coins is designed to satisfy the needs and desires of numismatists. Write for descriptive circular on the Library of Coins.

JUST ONE MAN'S OPINION

*The Carson City Dollars are the most underpriced series of
all coins minted.*

All one has to do is check the number minted of each year and you will see that there will never be enough to supply our five (5) million or more (est.) collectors.

Take the 1885 with only 228,000 minted. This would be one for about every twenty-one collectors.

Second comes the 1881 with only 296,000 and so on.

I have a few sets of the 1880 through 1885 complete in Strictly Brilliant Uncirculated.

For Set of Six (6) — \$39.50

Below are my prices for single coins . . . all Brilliant Uncirculated.

1878 CC \$ 4.75	1881 CC \$10.00	1884 CC \$ 6.75	1890 CC \$10.00
1880 CC 10.00	1882 CC 5.00	1885 CC 12.50	1892 CC 17.50
	1883 CC 5.00	1891 CC 6.50	

My second offering for this month is, in my opinion, a small set with a future. The War Time Silver Nickel consisting of 11 coins minted 1942 to 1945. (See Red Book.) This set in Brilliant Uncirculated is beautiful and also underpriced in this booming coin market.

My price for the complete set is \$9.95 Only until present stock is sold.

The 1943-D is of course in this set and this is one that I compare in value to the 1942-D which is selling today for \$8.00 each.

Note: As most everyone interested in coins knows I believe I have been the most active dealer in Carson City Dollars for quite a few years. I regret very much now to have to tell you that my stock is getting low and I have found it impossible to locate any more. My reason for advising you of this is to let my thousands of customer friends throughout the Country know that such is the situation and if they are at all interested in CC Dollars to add to their collection please do not wait too long.

No quantity orders solicited.

On and after March 20th anyone can reach me by telephone at a new store that I am opening. It will be located at 3966 Jonestown Road, Route 22, Harrisburg. This location will be used strictly for the retailing of coins and to handle all incoming telephone calls. Send all orders to the address above at Steelton the same as before. Everyone is invited to visit me at my new store when you are in my neighborhood.

JOHNSON'S APPROVAL SHIPMENTS

For twenty years now, busy people in the trades, business and professions, have found my approval shipments the easy, convenient way to build up nice coin collections. Start in now getting the best coin values, with the least bother possible.

Simply send me a list of the coins you need, in any series Half Cents to Gold coins, or Paper Money. Or, a list of the coins you already have, if shorter. You will receive a selection on approval, on which you pay \$10.00 or more a month on coins you keep. I send more coins as you make payments. You can stop shipments any time you do not want to continue. If you have no special series in mind, here are a few suggestions:

TYPE SET OF REGULAR U. S. COINS: One coin of each different design (not dates or mintmarks), from Half Cents to Silver Dollars. Album to hold the Type set will come with your first shipment.

TYPE SET OF U. S. GOLD COINS: Different designs of gold coins from Gold Dollars to \$20.00 pieces. A beautiful plastic holder for the type set with your first shipment.

FOREIGN SILVER DOLLARS: One Silver Dollar from each different country. Travel the world in your easy chair, from Afghanistan to Zanzibar. Album to hold the dollars, with first shipment.

COMMEMORATIVE HALF DOLLARS: The number one series in United States coins, a must for every collection. After first shipment, you can decide if you want to work on a Type set, or the Complete set. Incidentally, I believe I buy and sell more Commemorative coins than any other dealer, so if you have a set, part set, or any quantity you want to sell, just wrap them up and send to me for my best offer and check. Coins will be held intact awaiting your O.K.

UNITED STATES PAPER MONEY: Beautifully engraved notes, issued from 1862 to date. All illustrated and valued in the Friedberg Paper Money Book, which I would be glad to send on approval if you do not have a copy as yet.

ALSO INDIAN CENTS, LINCOLN CENTS, NICKELS, DIMES, QUARTERS, HALF DOLLARS, DOLLARS, CANADIAN COINS, FOREIGN GOLD COINS, FRACTIONAL CURRENCY, etc.

PURCHASES: Send collections or duplicates you wish to sell, by Registered Mail or Railway Express. I will figure them up and submit best offer and check. Then, will hold coins for your reply. If no deal, coins will be returned fully insured.

We have nothing against ethical people who deal in or sell rolls of coins. In fact they have been of great service to the hobby, by making rolls of coins available through the years at a fair and reasonable price. Now with unethical people invading our hobby, this has been made impossible. Their entire purpose is to squeeze the last cent from any roll, make the price of a roll, not what it's worth, but what is the most they can get out of it. When the bubble on rolls and bags bursts and the termites and others start crying a river, I will gladly furnish crying towels.

By the way, you do not have to pay the ridiculous prices for the 1959 nickel, as you can order mint sets (1959 that is) from the Treasury Dept. Each set contains 1 coin of each denomination of each mint, 10 coins in all. They are now packaged like the proof sets. Limit 80 sets per person. Send your money order or certified check to the Treasurer of the United States, Cash Division, Washington 25, D. C. Price per mint set of 10 coins is \$2.40. This includes postage and insurance.

ALBERT COLLIS

2 Court Street Newburyport 2, Mass.

Useful for cleaning all kinds of coins, but particularly adapted to cleaning coins of copper or nickel.

**EASY TO USE AND ECONOMICAL!
FAST ACTION — IT ACTUALLY
CLEANS IN SECONDS!**

Does not add shine, but brings out natural color, including original brilliance if it is still there under tarnish or coating. Dull or dark uncirculated coins become brilliant uncirculated coins in seconds.

This result of years of experiment can be safely used on valuable coins to improve their appearance and increase their value.

On sale in many leading stores in 4-oz. bottles, with full directions, at \$1.00.

If your dealer does not yet have it, send us \$1.00 for 3-oz. bottle (enough to clean hundreds of coins) carefully packed and postpaid to any address in the United States or Canada.

SPECIAL OFFER TO DEALERS
Send \$4.00 for six 4-oz. bottles of "CCC," postpaid.

TIRED OF BEING BOSSSED?

The world is full of people telling us what we can or cannot do!

When you have a hobby you are your own boss in one field at least—you can collect what you like, as you like, with no apologies for the way you do it.

If you have chosen coins as your hobby, you can go in many directions. I hope you collect MODERN FOREIGN COINS, because they are my specialty and I can probably do you some good if you will give me a chance.

My regular monthly price list is free for the asking. Why not do both of us a favor and write for it? I'll be glad to hear from you.
